

## UKRAINIAN FISH FARMING COMPANY

We cherish, transform, develop and enrich the ecosystem. We endeavour the life of our fish to be full of meaning for the happiness of people. Our growth is based on the ternary approach to the processes we design, customize and reproduce every day. This is the essence of our function with a vector of development from a **resource to a product company with a full production cycle.**

Since 2000, we develop the technology of sustainable production of the full cycle from controlled spawning, fish growing from larvae to a delicious product on your table on the basis of an ecological, honest, responsible and conscious attitude to everything we touch — fish, the environment, employees, partners, customers and communities.

## OUR BUSINESS APPROACH

### Product

In the ponds of Khmelnytskyi region with an area of 6,500 hectares, we reproduce all stages of fish growth – larvae, juvenile, adult fish. We carefully select, feed in standardized manner and breed pure genotypes of **carp, crucian carp, pike, white carp, zander, buffalo and crucian carp** year after year.

developed the technology of increasing the yield per hectare of ponds in 4 times compared to the original basis of the 3-year production cycle. Ukrainian Fish Breeding Company starts the testing and systematic reproduction of this technology from an area of 1160 hectares of the water

## Ecosystem

We consider that the greatest value of this process is that we do not harm lives.

We preserve every animal, plant, take care of their peace and comfort of existence.

We act on the principles of **ecohumanism** in order not only to preserve natural resources, but to reproduce and enrich the ecosystem

## OUR CAPACITIES

We can sell live, chilled, frozen fish and fish steaks:

## **CARP**

1000 tons per year

## **GRASS CARP**

500 tons per year

## SILVER CARP

500 tons per year

## OUR STRATEGY

from our employees, partners, company owners. We know for sure that exclusively happy fish could become the part of the happiness of free people

## Professionalism

Owners, managers, employees of the company – everyone works to ensure that the fulfillment of obligations, the will to professional self-realization, initiative and proactivity support the growth and systemic development of the company

## Improvement

We create conditions for the continuous professional development of employees as this enables the daily improvement of our technologies and the sharpening of the skills of our

employees. This becomes the foundation for their self-realization in the role and in the country where they want to be

## Social activity

It is extra important that the mission and values of the company are not just words on this site, that they are our genetic code, that the owners, employees and partners of the company live and breath by them. We introduce them in every stage of our performance, we implement them in our product, we involve the communities in their implementation and reproduce them in social projects

...
