

Ukrainian Fresh & Frozen Products

Ukrainian Fresh & Frozen Products is a fast-growing, global trading company supplying the best fresh and frozen products from Ukraine. We provide our clients with fresh and frozen berries, fruits, vegetables, mushrooms, and other high-quality products.

RENAMAX Logistics is a member of UFP Cluster, which allows us to be more productive and provide our customers with more options. The UFP Cluster partners have their own land, which enables us to monitor product quality from seedling to box. Our production capacity can quickly remake a large number of products and our own logistics company is able to promptly deliver to any destination. The **ProfiHort media resource** (Professional & Profitable Horticulture, www.profihort.com) allows us and our partners to stay up-to-date regarding innovation and knowledge of the horticultural sector.

Export products:

- **Organic berries** (raspberry, strawberry, blackberry, etc.): Berries grown in the Ukrainian virgin soil have a special rich taste and contain many healthy elements and vitamins. This is the main difference from berries grown in unchecked soils. Our berries are fertilized and protected from diseases and destructive insects only by biological products, ensuring we harvest organic, ecologically-pure berries.
- **Wild berries, created by nature** (blueberry, blackberry, elderberry, cranberry, lingonberry): Wild berries are genetically diverse, consisting of hundreds of different naturally-occurring varietal clones. This mix gives wild berries their unique, complex flavors. The intense, sweet-tart taste is extraordinary and cannot be duplicated through cultivation.
- **Wild Mushrooms, from the forest** (chanterelle, porcini): Our frozen mushrooms are processed as BQF and received from trusted supply partners by our experts in ecologically clean regions of Ukraine. Treated with care for optimum taste & freshness.

Fields: More than 400 hectares on which we and our partners grow various organic berries.

Factories: The factory for processing and freezing is certified by Organic Standard. Three chambers of shock freezing. Products are frozen within 12 hours after harvesting.

Distribution: +/- 3,000 pallets in storage at -20°C. Constant monitoring of room temperature and product temperature. Marking of each lot.

Logistics: More than 15 refrigerated trucks. We deliver anywhere in the world.

Our advantages:

- **High Quality:** We are a reliable partner, providing quality and meeting customers' deadlines. All our specialists have more than 5 years of experience. We like what we do.
- **Good Support:** Our managers are always ready to answer your questions. You can contact us on weekends and at night. You can also visit our factory to become personally acquainted.
- **Individual Approach:** Our company works according to the principle of individual approach to every client. This method lets us successfully address any issues at all levels.
- **100% Organic Berries:** All fields and products are certified by the Swiss-Ukrainian certifying authority Organic Standard, according to European standards of organic manufacturing operations.
