## ABOUT US

### Own rawmaterial base

The company grows eco-friendly raw materials on its land.

### Modern technologies

Modern European technological lines are used in the production, which allows to process raw materials quickly and safely.

The geography of canned exports is more than 20 countries.

### Long experience

Long experience in agribusiness contributes to the rapid development of the company.

### Transport and logistics

Own agricultural machinery allows to sow, grow, and harvest at the top level.

### Natural resources

The company rationally uses natural resources, which are accompanied by saving the environment.

Our team is the most valuable resource. Management promotes the professional and personal development of employees, invests in training and internships in Ukraine and abroad.

### Quality control

Product quality is controlled by a highly qualified production laboratory. Regular internal and external independent audits help to improve the quality of the final product.

### Product safety

Growing, processing, production and storage of products is controlled by law, so the consumer can be confident in the quality and safety of the final product.
